

VIVEK C N

Software Engineer | Python | FastAPI | React | Backend Developer
Karnataka, India | vivekvicky544957@gmail.com | +91-9108496235 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Software Engineer skilled in Python, FastAPI, React, JavaScript, SQL, and Machine Learning, with experience building scalable full-stack applications and AI-powered solutions. Published Springer research in smart agriculture, developed production-ready software, and completed software development internships focused on backend engineering, REST APIs, databases, and AI/ML. Passionate about solving real-world problems through clean, scalable software.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, C

Frontend: React.js, HTML5, CSS3

Backend: FastAPI, REST APIs, JWT Authentication, OAuth2, Generative AI (GenAI)

Databases: PostgreSQL, MySQL, Firebase, SQLAlchemy, Alembic

DevOps & Tools: Docker, Git, GitHub, Render, Vercel

Libraries: Scikit-learn, Pandas, NumPy

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Cloud Computing

PROFESSIONAL EXPERIENCE

Software Development Intern — CONTRIVER

Feb 2025 – Apr 2025

- Developed an AI-based E-Ticket Fraud Detection System using Python and Machine Learning, achieving 95% detection accuracy across 10,000+ ticket records and reducing fraudulent bookings by 91%.
- Built backend modules, integrated databases, optimized application performance, and collaborated using Git/GitHub.

AI & Machine Learning Intern — Quantum Learning

Apr 2024 – May 2024

- Built and evaluated machine learning models using Python.
- Performed data preprocessing, feature engineering, and exploratory data analysis using Scikit-learn and Pandas.

PROJECTS

Namma Raitha – Smart Agriculture Platform

Python | FastAPI | React | Firebase | [Live Demo](#)

- Developed a production-ready smart agriculture platform connecting farmers and buyers with AI-powered crop disease prediction, multilingual support, and real-time marketplace features.
- Published a [Springer Publication](#) based on the project and deployed the application using FastAPI and React.

SecureTrail AI – E-Ticket Fraud Detection System

Python | Random Forest | SVM | MySQL | [Live Demo](#)

- Built an AI-powered fraud detection system achieving 95% detection accuracy across 10,000+ ticket records, reducing fraudulent bookings by 91%.
- Developed secure ticket verification workflows with machine learning models, MySQL integration, and real-time fraud analysis.

Smart Agriculture Location Intelligence Hub

FastAPI | React | Leaflet | OpenStreetMap | [GitHub](#)

- Developed a 5-tier location intelligence platform with interactive GIS maps, proximity search, and AI-powered farming recommendations.
- Integrated real-time weather, water reservoir monitoring, village-level environmental telemetry, and location-based farmer-buyer discovery.

Other Projects Include: [Veritas AI – Fake News Detection](#), [AeroSense AI – Intelligent Air Quality Advisor](#), [Student Monitoring System](#), and several other software engineering, AI/ML, and full-stack development projects.

EDUCATION

Bachelor of Engineering, Computer Science & Engineering — Maharaja Institute of Technology, Thandavapura 2022 – 2026

CGPA: 8.5 / 10

Pre-University College (PCMB) — STG Pre-University College, Chinakuruli

Percentage: 93%

CERTIFICATIONS

IBM SkillsBuild – Machine Learning with Python | Google Cloud Skills Boost – Cloud Computing & Google Cloud Fundamentals

React JS | Artificial Intelligence & Machine Learning | Python Fundamentals | Programming in C | Cloud Computing

ADDITIONAL INFORMATION

Languages: English, Kannada

Activities: Participated in Hackathons, Technical Events, Coding Challenges, and Software Development Workshops.
